

# Bilan Carbone® - Essential Package:

Apply Bilan Carbone® with the official tools

7h self-paced e-learning + 2h live expert session - International programme

## LEARNING OBJECTIVES

- Use the official Bilan Carbone® V9 calculation tools with confidence.
- Structure a GHG inventory and collect, organise and analyse emissions data.
- Manage uncertainty, interpret results and begin developing transition plan.

### Total duration:

7 hours e-learning + 2h live session

Price: €990 incl. VAT

## PREREQUISITES

None

## WHO IS IT FOR?

*Professionals who want to understand and carry out carbon accounting and the Bilan Carbone® methodology using the official Bilan Carbone® tools : managers, sustainability teams, finance, purchasing, supply chain and other stakeholders.*

 E-learning + Live Q&A

### At the start of the e-learning :

The Essential Package includes the full Discovery Package, followed by practical training using the official Bilan Carbone® V9 tools and realistic exercises.

Participants work on emissions categories, data collection, calculation methods, methodological choices and uncertainty management. A realistic case study supports practical application.

The package also includes a two-hour live, small-group Q&A session with an expert trainer.

A final online quiz checks the main learning outcomes.

BILAN® 2025  
CARBONE

### IMPORTANT :

Includes 1-year access to the official Bilan Carbone® V9 tools.

## ASSESSMENT & LEARNING VALIDATION

Initial self-assessment quiz

Final quiz to check learning outcomes.

Certificate of completion issued at the end of the course.

A satisfaction survey is completed at the end of the course.

## LEARNING METHODS & RESOURCES

The The Essential Package combines the complete Discovery programme with practical training in the official Bilan Carbone® calculation tools. Participants learn through realistic exercises and a case study.

### Package content:

Discovery Package + practical use of the Bilan Carbone® V9 tools: emissions categories, data collection, calculation methods, methodological options, uncertainty management and transition planning.

**Includes one year of access to the official calculation tools and a two-hour live, small-group Q&A session with an expert trainer.**
